January 10, 2025

To our valued customer,

North American Stainless (NAS) produces stainless steel. NAS complies with US Environmental Protection Agency's Toxic Substances Control Act (TSCA) Chemical Data Reporting (CDR) rule that requires chemical manufacturer and importers to report information about the manufacturing, processing and use of covered chemicals, chemicals concentrations and potential exposure in industrial, commercial and consumer settings.

NAS complies with TSCA Section 6, restrictions as described below.

- Asbestos
- Lead, when used in paint
- Polychlorinated biphenyls (PCBs)
- Dioxins
- Chlorofluorocarbons (CFCs, ozone depleting substances)
- Metallic mercury, when used in consumer products
- Formaldehyde, when used in composite wood products
- Nitrites, when used in certain cutting fluids
- Hexavalent chromium compounds, when used in water treatment
- Five Persistent, Bioaccumulative, and Toxic (PBT) substances restricted in 2021:
 - PIP 3:1 (CAS 68937-41-7)
 - DecaBDE (CAS 1163-19-5)
 - 2,4,6 TTBP (CAS 732-26-3)
 - HCBd (CAS 87-68-3)
 - PCTP (CAS 133-49-3)

Please review the SDS for our steel concerning the hazards associated with its constituents. Hexavalent chromium may be generated during melting or welding of stainless steel. Lead may be detectable in our product, but is not intentionally added.

If you have any questions, please do not hesitate to contact me at 502-347-6534.

Sincerely,

A handwritten signature in blue ink that reads "Maria Eichelberger". The signature is written in a cursive, flowing style.
